

# Capability Statement

## Our Capability

We partner with our clients and their teams, helping them to deliver exceptional customer experiences through designing, implementing, and supporting the right technology solutions.

## The Envisage Technology Difference

We exist to guide organisations and their people through technology.

The organisations we partner with represent a wide range of sectors, the common theme is that each of them is focusing on delivering exceptional customer experiences and understanding that integrating technology and data with their people's capability will achieve enhanced operational delivery.

We deliver the highest level of quality and service under a consultative approach that seeks to understand our client's goals, the barriers to them reaching these goals, and the opportunities that exist along the journey to them.

We understand that the challenges our clients face change as their organisation moves through its

lifecycle. We draw on our own first-hand experience of growth, alongside that of partnering with organisations over long periods of time as they navigate several shifts in their business.

Our client-partner focused philosophy means that each of our services is tailored to the unique needs of your business.

## We're always striving to be...

### Responsive

We're always there when you need us.

### Experienced

We've provided IT services and support to hundreds of clients since 1998.

### Skilled

We invest in training for our people and equip them with the best tools possible.

Envisage always provides a level of service to our clients that aligns with our own values and expectations, and I feel confident in recommending them.

Zipporah French - Director, Prescribe Practice Management

We have found the team at Envisage to be effective, responsive and knowledgeable and, since the roll out of the initial projects, have continued to use them as our ongoing IT support.

Zac Herps - Managing Director, Hillhouse Legal Partners

### Our services

Drawing on our years of experience and practical knowledge across a wide range of sectors, we offer a full suite of integrated services, including:

#### Managed services

Keeping your business systems operating.

#### VCIO

Keeping technology aligned to your strategy.

#### Cyber security

Keep your business data safe from attack.

#### Cloud computing

Unlock mobility, security, and flexibility through cloud solutions.

#### Data analytics

Identify and unlock the valuable insights in your data.

We highly recommend Envisage for the comprehensive and proactive IT support they provide alongside their ability to tailor their advice to each businesses' needs and stage of growth.

Hugh Walsh – Partner, Walshs Practice
